

MINITRUNKING SYSTEMS

MAIN TECHNICAL FEATURES

Material: technopolymer on rigid PVC base, self-extinguishing V0 (UL94) and high resistant to UV rays.

Standard colours: white RAL 9001 e slate-grey RAL 7021 or brown RAL 8014.

System protection degree: IP40 (trunking + cover).

Resistance to mechanical shocks MC series: IK 07 (shocks up to 2 j).

Resistance to heat in continuous use: up to +70° C.

Resistance to abnormal heat: up to 650° C (Glow Wire Test, Reference Standard IEC 695-2-1).

Insulation resistance > 100 MΩ.

Dielectric voltage > 3.000 V~.

Installation temperature range: minimum -5° C, maximum +60° C.

Standard length: 2mt bars.

Reference Standards: EN 50085-1, EN 50085-2-1.

Products complying with the main requirements of the regulation B.T. 2006/96/CE.

Products complying with the regulation RoHS 2002/95/CE.

MAIN TECHNICAL FEATURES

Externally grooved bottom for a fast fixing by glues or silicone adhesives

Wrap-around cover without sharp edges, functional modern design

In the trunkings with wrap-around cover the lid can be removed only by a proper tool

The particular form makes the most of the inner room and permits to unify the accessories

Perforated bottom for a quicker and more precise installation

The minitrunkings can have 1,2 or 3 internal compartments for any distribution need

The bottom of the wrap-around trunkings has got a spacing profile for the installation in the corner

Accessories for change of direction for any installation need

Fully made of self-extinguishing technopolymer on PVC base and available in white RAL 9001 or, on request, in grey RAL 7030 and brown RAL 8014, the minitrunkings are characterized by perfectly symmetric inner compartments; they can be easily installed on the wall, as skirting board and also in the corner, thanks to the spacing profile (in the version with wrap-around cover), which keeps the trunking distant enough from the wall, so that the cover can be set without any problem.

The wide range of minitrunkings MC and MCA with standard or wrap-around covers is composed of 23 different dimensions and types, with

an inner splitting with 1, 2 or 3 sections. The perfectly separated compartments permit to put, in the same trunking, the wires of different electric circuits: power, phone, data transmission and other, without any risk of interferences or inappropriate overlapping, according to the Standard CEI 64-8.

The derivation boxes has an appropriate grid allowing to keep the cables divided. The device boxes, equipped with a blank cover, can be also used as further junction boxes. Some sizes of the minitrunkings system are available with or without internal separator. That is an undoubted advantage for the renovation and the widening of

complex electrical systems (power, telephone, HI-FI television, SAT) without the risk of interferences.

The several accessories for the change of direction, the derivation boxes and the device boxes allow to put together a complete and functional distribution system.

The minitrunkings MC and MCA can be combined with skirting board and wall trunking system and cable trunking system, as well as the modular enclosures manufactured in the same colour as the minitrunkings, in order to fulfill the installation and renovation needs with a compact elegant functional system.

TECHNICAL SPECIFICATION

Detail of the minitrunking with hinged cover

The closing system of the cover assures a robust shutting which makes the installation faster

The hinge is so designed to guarantee a long-lasting closing

The smoothed shape of the Series MCA perfectly fits in with any environment

The minitrunkings MCA have a double-sided adhesive tape for a lasting fixing

The wall-mounting device boxes are the ideal complement to the minitrunkings

The plentiful sizes offer very good solutions also for the most demanded installations

Fully made of self-extinguishing rigid PVC and available in white RAL 9001 or, on request, in brown RAL 8014, the minitrunkings series MA has the bottom provided with a double-sided adhesive tape which permits the temporary or permanent fixing on smooth clean surfaces.

The integrated hinged cover is another peculiarity of this series. This practical solution combines in a single action the installation of

the bottom and the cover, so that the lids can't get lost during the installation or any following maintenance works.

The particular wrapping design without sharp edges looks very discreet, so that it can be used in elegant environments.

The minitrunking range is composed of 6 different dimensions, which enable the installer to choose the most suitable dimension for the

installation need. The minitrunkings MC and MCA can be combined with skirting board and wall trunking system and cable trunking system, as well as the modular enclosures manufactured in the same colour as the minitrunkings, in order to fulfill the installation and renovation needs with a compact elegant functional system.

MINITRUNKINGS WITH FRONT-HOOKING COVER SERIES MC

MAIN TECHNICAL FEATURES:

- Made of self-extinguishing technopolymer on rigid PVC base.
- Perforated bottom for fixing by screws or plugs.
- Bottom designed for fast fixing by silicone adhesives
- Accessories are set onto the trunking with a simple click.
- Resistance to mechanical shocks IK 07.
- Protection degree IP 40 only if installed with the proper accessories.
- Front-hooking cover supplied already mounted on the bottom, standard bar length: 2m.
- Packed in strong cardboard boxes suitable for transport and storage.
- Colour code: G = grey, M = brown

COMPONENTS OF THE MINITRUNKING SYSTEMS

The minitrunking systems are composed of the trunking and accessories for the change of direction, the joining and the derivation, that, if correctly assembled and installed, form a system with protection degree IP40.

The accessories for the change of direction are set directly on the trunking with a click.

MINITRUNKING WITH FRONT-HOOKING OR WRAP-AROUND COVER

MADE OF SELF-EXTINGUISHING TECHNOPOLYMER

90° INTERNAL ANGLE FOR CHANGE OF DIRECTION

90° EXTERNAL ANGLE FOR CHANGE OF DIRECTION

90° FLAT ANGLE FOR CHANGE OF DIRECTION

STRAIGHT JOINT TO LINK 2 TRUNKING TRACKS

T JOINT FOR DERIVATIONS ON THE SAME LEVEL

- Made of self-extinguishing technopolymer on rigid PVC base.
- Perforated bottom for fixing by screws or plugs.
- Bottom designed for fast fixing by silicone adhesives.
- Accessories are set onto the trunking with a simple click.
- Front-hooking cover supplied already mounted on the bottom.
- Standard bar length: 2m.
- Packed in strong cardboard boxes suitable for transport and storage.

IP 40

FLOOR TRUNKING SERIES CAP

MAIN TECHNICAL FEATURES:

- Made of self-extinguishing technopolymer on rigid PVC base.
- Shock resistance: 6 j.
- Three separated compartments for different electrical circuits.
- Bottom designed for fixing by screws or plugs or perforated for fixing by silicone adhesives.
- Wrap-around cover, it can be removed only by a proper tool.
- Standard bar length: 2m.
- Packed in strong cardboard boxes suitable for transport and storage.
- **Colour code: B = white, G = grey, A = slate grey**

MODULAR FLOOR BOXES SERIES 160

MAIN TECHNICAL FEATURES:

- Made of shockproof technopolymer.
- Single-sided with a device holding front with a variable angle.
- Protection degree between floor and box.
- It can be installed on concrete or floating floors.
- Ready for a detecting lamp.
- Product complying with the Standards CEI 64-8 and 23-73

WALL MOUNTING WHITE MODULAR ENCLOSURES SERIES 600

MAIN TECHNICAL FEATURES:

- Reversible door made of smoky grey polycarbonate.
- Suitable for housing the brass terminals.
- Suitable for plumbing of the cover.
- Galvanized steel DIN rail already mounted.
- Lid for unused modules.
- Self-adhesive label to identify the different circuit.
- Screw caps for double insulation.

IP 40

INSTALLATION INSTRUCTIONS FOR THE MINITRUNKING SYSTEMS

SERIES MC

SERIES MCA

SERIES MA

To install the minitrunkings or the cable trunkings on walls or ceilings, or, in any case, on non-conducting surfaces, it is strongly recommended using expanding plugs (our item TC), minimum diameter 4mm and maximum diameter 6mm with their screws, or steel nails, minimum 30cm and maximum 70cm one from the other. Always fix the trunking close to the accessories.

To anchor the trunking to metallic walls not connected to the earthing circuit or in any case to conducting surfaces, it is suggested employing a silicone adhesive or a common mastic, easy to find on the market; taking into account that the indications for use must be carefully followed.

For not particularly hard uses it is suggested installing the trunkings by a double-sided adhesive tape, so that the installation turns out to be easier and quicker. Before proceeding please verify the holding of the adhesive tape on a test sample, which must be smooth and clean. To cut the trunking and its cover please use a fine toothed hacksaw.

To change direction please use our accessories with the same dimension as the trunking, as indicated in our catalogue and according to the indications of the reference Standards EN50085-1, EN50085-2-1.

Internal angle

External angle

Flat angle

Straight joint

T-joint

End cap

Once the trunking has been fixed to the wall, the separators, the junction and/or device boxes have been installed and the wiring has been done, the cover can be mounted on the bottom with a simple click; if necessary cut the lid in order to hook the accessories (placed as indicated below) on to the trunking.

In order to gain the correct protection degree IP, the accessories must be fixed to the trunking by securing the tag of the end cap to the trunking through the passing screw and by sticking the accessories for the change of direction to the trunking bottom with a silicon mastic.
